

The Ultimate Monsoon Sanctuary

Authentic Ayurvedic Healing and Rejuvenation at
Somatheeram Ayurveda Group

BABY MATHEW
Chairman and
Managing Director

Nestled along the tranquil, emerald coast of Kerala, the Somatheeram Ayurveda Group stands as a global beacon of authentic Ayurvedic healing, Yoga, and Meditation. Founded in 1985 by visionary entrepreneur Mr. Baby Mathew, this pioneering institution introduced the revolutionary concept of an “Ayurveda Hospital in a Resort Ambience.”

Today, Somatheeram is recognized as India’s premier healing and wellness destination, masterfully blending world-class clinical excellence with the serene tranquility of a tropical retreat. Boasting three NABH (National Accreditation Board for Hospitals & Healthcare Providers) accredited Ayurveda hospitals, the group offers a sophisticated sanctuary. For athletes, analytical minds, and wellness-conscious individuals alike, it provides the ultimate environment for physiological recovery, stress mitigation, injury rehabilitation, and deep cellular resetting.

The Monsoon Phenomenon: The Peak Recovery Season

While Somatheeram offers transformative healing year-round, the Monsoon Season (Varsha Ritu) represents the absolute pinnacle of Ayurvedic therapy. Classical texts revere this rainy period as nature’s optimal window for deep purification, tissue repair, and metabolic reset.

■ **Atmospheric Advantage:** The cool, dust-free, and highly humid monsoon climate naturally opens the

body’s micro-channels (Srotas), relaxing the nervous system.

■ **Enhanced Absorption:** Tissues become more receptive, allowing medicated herbal oils and bespoke formulations to penetrate deeply

into joints and muscle groups.

■ **Total Detoxification:** An ideal environment for Panchakarma (the five elimination therapies), metabolic correction, and accelerating sports-related or chronic injury rehabilitation.
