

FROM SLUMP TO SILVERSTONE GLORY

Desperate for a quick turnaround of fortunes, Charles Leclerc overcame his struggles at the British Grand Prix to conjure a **confidence-boosting** victory, the ninth of his career.

Coming into the British Grand Prix weekend, the pressure was firmly on Charles Leclerc.

After a couple of third-place finishes in Australia and Japan early in the season, the Ferrari driver's form had nosedived over the previous three races.

The slump began with a crash and a DNF in his home Grand Prix in Monaco, followed by a power unit-related retirement in Spain and an underwhelming eighth-place finish in Austria.

"We've got to work and try to understand what's going on there. I've been struggling a lot," Leclerc said after the Austrian Grand Prix, cutting a sorry figure.

Desperate for a quick turnaround in fortunes, Leclerc overcame his struggles at the iconic Silverstone circuit to conjure a confidence-boosting victory, his ninth career win and Ferrari's 250th overall.

The win was significant for the 28-year-old in more ways than one. It brought to an end a nearly two-year winless streak — Leclerc

Easy does it: Amidst all the chaos of the race, Leclerc kept his composure out front to register a crucial win and get his campaign back on track. AFP

last stood on the top step of the podium at the 2024 United States Grand Prix.

It also came at a time when his teammate on the other side of the Ferrari garage, Lewis Hamilton, had been riding a wave of resurgence since his famous first win in scarlet red at the Barcelona-Catalunya Grand Prix.

In fact, Hamilton's growing comfort with the Ferrari prompted Leclerc to tweak the car's set-up ahead of Silverstone to unlock more potential. The torque and differential settings were adjusted to improve front-end grip in slow corners.

"I had two options. One was to change my driving style and basically copy Lewis, because that seemed to be working very well.

The second was to keep my driving style and find a way around the car, and that's
