

6} The number of left-handed batters to register a 150-plus score against Sri Lanka while batting at No. 3. Devdutt Padikkal in Galle became the latest to join this small group of players — scoring a career-best 167. Vinod Kambli is the only other left-handed Indian at No. 3 to register a three-figure score against Sri Lanka in Tests. He did it twice — 125 at Sinhalese Sports Ground and 120 at Saravanamuttu — during the 1993 series.

211} The number of runs off Devdutt Padikkal's bat in the Galle Test. This is the second-highest match aggregate by an Indian batter in Test cricket in Sri Lanka. Only Virender Sehwag (251) has more runs in a Test in Sri Lanka for India.

4} The number of Test players with 4000-plus runs and 350 or more wickets during their career. It will be pertinent to note that Jadeja has the best career batting and bowling average among these players listed below. However, Botham is the quickest to achieve this double in fewer Tests (83). The second table lists the three left-arm slow bowlers to claim 350-plus wickets in Test cricket history.

4} The number of players to hit 100 or more Test sixes during their career. Rishabh Pant, in the second innings in Galle on 18 August 2026, achieved the rare feat by joining an elite group of three other players. What makes Pant stand out in this list is that he is the quickest to do so in terms of innings and while facing fewer deliveries.
