

Praveen Chithravel

Praveen Chithravel enters Aichi-Nagoya as an outside gold contender, with current numbers placing two Chinese rivals ahead.

After Hangzhou bronze and 2025 Asian silver, he took Commonwealth Games silver this August with 16.58m. His 2026 season's best is a more persuasive 17.08m, while his National Inter-State victory came at 16.92m. The encouraging selection detail is Zhu Yaming's absence from China's published squad. The difficulty is that his replacements are not weaker on current numbers: Su Wen has reached 17.40m this season and Ma Yinglong 17.11m. Japan's lone entrant, Manato Miyao, is further back at 16.64m. Chithravel therefore enters behind two Chinese rivals on the year's list, but his 17.37m Indian record proves the distance is there for the taking. Championship triple jump often turns on legal execution rather than averages. A safe

opening mark near 16.80m would buy him freedom; to take gold, he will need to approach 17.20m and force China to answer.
