

50M RIFLE 3 POSITIONS WOMEN'S TEAM

ASHI CHOUKSEY, VIDARSA K. VINOD AND TILOTTAMA SEN

This troika has proven pedigree.

Chouksey is the standout name. In 2024, she bettered the then qualification world record with a 597 at the national selection trials. She went a step further a year later, producing an exceptional 598 at the Dehradun National Games, and has since continued to perform at a high level. At the 2025 Asian Championships, Chouksey also played a part in India winning 3P team gold alongside Sift Kaur Samra and Anjum Moudgil.

Vidarsa has emerged rapidly. She topped qualification (RPO) with 590 at the February Asian Championships before shooting 588 in qualification at the Munich World Cup. In July, she produced 587 in qualification and finished sixth in the final of the ISSF World Cup in Hangzhou, her best result at an ISSF event. The scores underline Vidarsa's ability to consistently operate around the 590 mark in qualification.

Tilottama (**in pic**), meanwhile, brings enormous potential. At just 18, she already has two junior ISSF World Championships and a senior World Cup medal to her name. Her 3P credentials have strengthened considerably, with Tilottama winning the 2025 National Championship title with 591 in qualification before producing 466.9 in the final. She has also been in outstanding form in 2026, winning three successive 3P finals during the national selection trials.

A team featuring a double Olympic medallist cannot be discounted.

Manu (**in pic**) finished seventh in her preferred 10m air pistol event at the Asian Rifle and Pistol Championship in February but bounced back strongly in the 25m pistol, winning silver. She also demonstrated encouraging form at the Munich World Cup in May, partnering Samrat Rana to silver in the 10m air pistol mixed team event.

Her big-meet experience remains unmatched in the Indian field. With Suruchi and Esha alongside her, India possesses a realistic shot at team gold.

MANU BHAKER, SURUCHI SINGH AND ESHA SINGH

10M AIR PISTOL WOMEN'S TEAM
