COMPOUND WOMEN'S INDIVIDUAL

JYOTHI SUREKHA VENNAM

Jyothi, who hails from Vijayawada in Andhra Pradesh, is India's most decorated compound archer.

The 30-year-old has already won five medals, including three golds, at the Asian Games. In Aichi-Nagoya, she will have the added responsibility of guiding a young team, and she has already shown that leadership quality.

At World Cup Stage 4 in Madrid, the trio of Jyothi, Prithika and Chikitha clinched the women's team silver. During that run, the Indians stunned South Korea in the semifinals.

With compound archery finally set to make its Olympic debut with the mixed team event at Los Angeles 2028, Jyothi will also look to form a strong pair with one of the three men and aim for gold in Aichi-Nagoya.

SPECIAL ARRANGEMENT

COMPOUND MEN'S INDIVIDUAL

SAHIL JADHAV

Sahil, a 25-year-old archer who hails from Maharashtra's Satara district, topped the men's trials to qualify for the Asian Games. For someone who was introduced to the sport at a summer camp after passing Class 10, this was a huge result but, perhaps, not completely unexpected.

Last year, Sahil had his first moment in the spotlight when he grabbed the individual gold at the World University Games. He finally made it to the senior

national side for the Asian Championships in Dhaka and clinched silver in the men's team event. It worked as a shot in the arm for Sahil, as he stood first in the trials held in January for this year's World Cup Stages 1 (Mexico) and 2 (China).

In China, he almost stunned France's Nicolas Girard, the reigning world champion, in the semifinals before a heartbreaking 146-147 defeat. He recovered quickly and defeated Danish veteran, Martin Damsbo, in convincing fashion to clinch the bronze.
