Surfing will make its Asian Games debut at Akabane Long Beach in Tahara, Japan.

India will have representation in both the men's and women's shortboard competitions. All eyes will be particularly on 18-year-old Kishore after his run to the semifinals of last year's Asian Surfing Championships in Mahabalipuram. 16-year-old Kamali (**in pic**) is another exciting talent.

Competing against Asia's best surfers will provide valuable experience to the Indians.

Rowing was introduced at the Asian Games in 1982, and India has never finished a campaign without a medal. The 2010 edition in Guangzhou was the most successful one for Indian rowers, with Bajrang Lal Takhar winning a historic gold while the contingent also collected three silver and one bronze. Multiple podium finishes in Aichi-Nagoya are a realistic possibility, building on the five medals India won in the previous edition.
