

POWERPLAY BOWLING

10.85**Worst spin economy rate
in the PowerPlay among
teams**

CSK struggled to find a reliable spin option to control the first six overs. The side conceded boundaries regularly and recorded the lowest dot-ball percentage (27%) during this phase.

While Noor Ahmad was effective once the field spread, CSK's attempt to use R. Ashwin in the PowerPlay did not yield results, with the veteran conceding 12.33 runs per over. The team will hope Akeal Hosein or Prashant Veer can provide control this season.
