

« He (Rohit) has done a lot of work behind the scenes. He looked very good in the nets. This is a newer version of Rohit as well – much fitter and very committed. So, I'm looking forward to him leading us from the top. – Mahela Jayawardene, MI head coach »

SQUAD

DEATH-OVERS FIREPOWER

179.32

Second-best batting strike rate in the death overs in IPL 2025

Mumbai Indians finished as one of the most destructive teams in the final overs last season. Naman Dhir and Hardik Pandya led the charge, striking at 195.87 and 170.73 respectively.

Suryakumar Yadav ensured the momentum carried through after building long innings, finishing with a remarkable 204.83 strike rate at the death. Tilak Varma, striking at 187.75 in this phase, also proved a valuable finisher and could see more time in that role after thriving lower down the order for India during the recent T20 World Cup.

SIX-HITTING THREAT

36

Sherfane Rutherford's sixes after the PowerPlay since 2026

West Indies batter Sherfane Rutherford has been one of the most explosive hitters in the middle and death overs of T20 cricket recently. Since the start of 2026, he has hit the second-most sixes after the PowerPlay (minimum 10 innings).

The left-hander strikes at 176.24 beyond the first six overs, thriving particularly against pace bowling, which accounts for 51 of his 72 boundary hits. Mumbai Indians' challenge may lie in fitting him into the playing XI given the wealth of overseas options in the squad, despite trading him in from Gujarat Titans ahead of the auction.

PLAYER TO WATCH

Jasprit Bumrah's ability to control the death overs while striking at crucial moments continues to shape MI's bowling plans each season.
