

MIDDLE-OVERS MELTDOWN

49.29

**Worst bowling average
in overs 7-15 in IPL 2025**

Rajasthan Royals' struggles with the ball in the middle overs proved decisive in its disappointing campaign. The side recorded a bowling average of 49.29, the worst among all teams by a considerable margin.

Royals picked up just 24 wickets in this phase, the lowest in the league, while also registering the lowest dot-ball percentage (23.2%). The inability to apply pressure meant the side conceded seven 200-plus totals in 14 matches, losing six of those games.

While Maheesh Theekshana and Wanindu Hasaranga contributed wickets, the pace attack lacked penetration.
