SEARCHING FOR STABILITY

7

Opening combinations used in IPL 2025

Delhi Capitals struggled to settle on a consistent opening pair last season, using seven different combinations across the campaign. None of these lasted more than three games, while two were tried just once.

The injury to Faf du Plessis compounded the instability. Karun Nair and Abishek Porel offered the most promising option, scoring at 11.05 runs per over, but were given only two opportunities.

The constant reshuffling disrupted rhythm, reflected in a modest PowerPlay run rate of 8.76, the second-lowest in the league.

UNDERUSED ASSET

9.00

Mitchell Starc's economy at the death

Mitchell Starc was among the most effective bowlers in the death overs last season. His economy of 9.00 was bettered by only three bowlers, while his wicket-taking rate, one every eight balls, was the best in this phase.

Despite this, Delhi Capitals underutilised him, handing him just 54 deliveries at the death. Following his withdrawal from the latter stages of the tournament, the side turned to Mukesh Kumar and Mohit Sharma, who conceded at 14.11 and 11.41 respectively.

PLAYER TO WATCH

Lungi Ngidi's ability to control the game with variations, particularly in the death overs, could prove crucial as Delhi Capitals look to stabilise a bowling unit that faltered late in games last season.
