

'IT'S NOT ROCKET SCIENCE, IS IT?' THE STORY BEHIND INDIA'S FIRST INDIGENOUS COMPOUND BOW

After having helped manufacture rocket and missile components for India's aerospace and military sectors, **Girish Venkatasubban** is now on a mission to revolutionise Indian archery.

+

The Tej 28 series of bows are designed specifically for younger archers, with a shorter draw length of 28 inches and a draw weight between 15 and 40 pounds.
