Saudi Arabia, the host of consecutive Esports World Cups, might have had a setback regarding the Esports Olympics, but its stronghold in the domain continues to be one of the strongest in the world.

It will host the FIFAE World Cup Finals at the SEF Arena in Riyadh from December 10 to 19. In the qualifiers, India fielded teams in both console and mobile, with only Danial Patel making it to the final in the latter. On the console, India lost out on a playoff spot on goal difference, but Danial topped the regional qualifiers and secured a berth in the finals through the playoffs.

He will now represent the country in Riyadh.
