

customisable option. Greek yoghurt is already packed with protein, and adding a scoop of protein powder turns it into a perfect post-workout dessert.

How to make it: Start with 1 cup (240 g) of Greek yoghurt, which is naturally high in protein. Add 1 scoop (20–25 g) of whey or plant-based protein powder, and top with fresh fruit (about 75 g), 1 tablespoon (15 g) of chia seeds, and 2 tablespoons (30 g) of nuts or granola. It's quick, easy, and nutrient-dense.

Why it works: Greek yoghurt is rich in protein, and the added protein powder further supports muscle recovery. The toppings provide fibre, healthy fats, and antioxidants, making this dessert a well-rounded option after training.

Chocolate Protein Balls

Sometimes, you just need a quick and portable snack or dessert. These chocolate protein balls are perfect for busy athletes who want something high in protein and easy to grab after a workout.

How to make it: Combine 2

tablespoons (30 g) of cocoa powder, 1 scoop (25 g) of protein powder (whey or plant-based), 3 tablespoons (45 g) of nut butter, and 1 tablespoon (15 ml) of a natural sweetener like honey or dates. Roll the mixture into bite-sized balls and refrigerate for 1–2 hours.

Why it works: These little bites are packed with protein to help with muscle recovery, and healthy fats from the nut butter keep you feeling satisfied. They're easy to store and grab on the go, making them an ideal post-workout snack.

Bonus: Protein Mug Cake

Sometimes, after an intense workout, nothing beats the comfort of a warm dessert. A protein mug cake is a quick and easy way to satisfy your sweet cravings while giving your body the protein it needs for recovery.

How to make it: In a microwave-safe mug, combine 2 tablespoons (30 g) of protein powder, 2 tablespoons (30 g) of almond flour, 1 tablespoon (15 ml) of sweetener like honey or stevia, and 2–3

Smart moves: Recovery is where the real progress happens, therefore it's important to indulge in cravings wisely. GETTY IMAGES

tablespoons (30–45 ml) of milk. Microwave for 60–90 seconds, and you'll have a warm, protein-packed cake ready in no time. Top with Greek yoghurt for extra protein and nutrition.

Why it works: A mug cake offers the warm comfort of dessert while fuelling your muscles with protein.

It is important to properly fuel the body after intense training.

Recovery is where the real progress happens, and these high-protein desserts are designed to help you refuel while satisfying your sweet cravings.

With festivals approaching, these desserts also provide a healthier way to indulge during celebrations while keeping your nutrition in check.

Enjoy these treats knowing they're working just as hard as you are to support your recovery!
