

Left-arm wrist spinners in IPL over the years

Stock ball% Variation %

Stock ball - the one which moves into the right-handed batter.

change-ups — an unprecedented split. Most of these have been googlies, which have fetched 19 wickets (13 against right-handers) at an economy of 7.08.

That shift in balance — from stock deliveries to deception — has powered the current success.

But the bigger question is whether this trend can last.

As more bowlers adopt the style and batters see it more often, the element of mystery will fade. T20 cricket evolves quickly, and novelty rarely stays novel for long.

For now, though, left-arm wrist spin has found its moment. And IPL 2025 may well be remembered as the season this once-niche art finally took centre stage.
