

Death-over scores comparison (IPL 2024 vs 2025)

season, compared to nine last year, at an economy rate of 8.33 and an average of 20.83.

Queering the pitch

In six of the 12 venues used so far in IPL 2025, the run rates have dropped in comparison to last season. Delhi's Arun Jaitley Stadium and Bengaluru's M. Chinnaswamy Stadium have seen the sharpest decline, with run rates dropping from 11.20 to 9.49 and 9.84 to 8.90, respectively. Meanwhile, among venues that have hosted at least four matches this season, Ahmedabad is the only one that has seen a noticeable jump in run rate — an increase of 0.83 runs an over.

The improved returns for spinners on traditionally batting-friendly surfaces have largely driven this turnaround. In Delhi, the spinners have conceded eight runs an over on average, compared to 10.28 last season, while their average has improved from 29.68 to 23.53. Similarly, in Bengaluru, the tweakers have an economy rate of 8.22 this year, compared to 8.98 in 2024, while their average has improved by more than 10 runs per wicket, dropping to 32.42 from 42.66.

The other venues that have witnessed a marginal dip in overall run rates are Wankhede Stadium in Mumbai (9.54 to 9.42), Kolkata's Eden Gardens (10.47 to 9.81), M.A. Chidambaram Stadium in Chennai (8.52 to 8.37), and ACA-VDCA Cricket Stadium in Visakhapatnam (10.34 to 10.09).

Bowling lengths in death overs (IPL 2024 vs 2025)

	Yorker	Length ball	Back of a length	Short	Full
Economy Rate in 2024	8.95	10.17	10.46	13.03	14.45
Economy Rate in 2025	6.9	10.33	10.03	12.07	10.9
Average in 2024	31.69	25.61	27.18	28.35	24
Average in 2025	12.78	19.06	20.48	25.84	17.5
