

WINNING THE PHASES

HERE'S A COMPARATIVE LOOK AT HOW THE TOP 12 TEAMS AT THE T20 WORLD CUP 2026 PERFORM WITH BAT AND BALL ACROSS THE THREE PHASES OF AN INNINGS

METHODOLOGY

1 The radar graphs, for the 12 highest-ranked teams* at the T20 World Cup 2026, are based on six run-rate-based elements – PowerPlay batting, batting vs spin, death batting, PowerPlay bowling, spin bowling, and death bowling – counting from the previous World Cup final (June 30, 2024) to January 20, 2026.

PowerPlay - Overs 1-6
Death - Overs 16-20

ZIMBABWE

- 13 out of 41 games played since 2024 came against weaker African opposition
- Minimal experience of subcontinent conditions, only played four games in the region
- The biggest weakness in batting is while countering spin, good numbers across phases with the ball in hand
