

Project 49, Multiplication Table: Display the multiplication table up to 12×12 .	245
<i>Practice spacing text.</i>	
Project 50, Ninety-Nine Bottles: Display the lyrics to a repetitive song.	248
<i>Use loops and string templates to produce text.</i>	
Project 51, niNety-nniinE BoOttels: Display the lyrics to a repetitive song that get more distorted with each verse.	251
<i>Manipulate strings to introduce distortions.</i>	
Project 52, Numeral Systems Counters: Examine binary and hexadecimal numbers.	255
<i>Use Python's number conversion functions.</i>	
Project 53, Periodic Table of the Elements: An interactive database of chemical elements.	259
<i>Parse CSV files to load data into a program.</i>	
Project 54, Pig Latin: Translates English messages into lgpay Atinlay.	263
<i>Use text parsing and string manipulation.</i>	
Project 55, Powerball Lottery: Simulate losing at the lottery thousands of times.	267
<i>Explore probability using random numbers.</i>	
Project 56, Prime Numbers: Calculate prime numbers.	272
<i>Learn math concepts and use Python's math module.</i>	
Project 57, Progress Bar: A sample progress bar animation to use in other programs.	275
<i>Use the backspace-printing technique to create animations.</i>	
Project 58, Rainbow: A simple rainbow animation.	279
<i>Create animation for beginners.</i>	
Project 59, Rock Paper Scissors: The classic hand game for two players.	282
<i>Implement basic game rules as a program.</i>	
Project 60, Rock Paper Scissors (Always-Win Version): A version of the game where the player cannot lose.	286
<i>Create the illusion of randomness in a program.</i>
