

After entering the source code and running it a few times, try making experimental changes to it. On your own, you can also try to figure out how to do the following:

- Use different starting numbers than 0 and 1.
- Create the next number by adding the previous three numbers instead of the previous two.

Exploring the Program

This is a base program, so there aren't many options to customize it. Instead, consider: how could you use this program? What other useful sequences could be programmed?
