

```

27.         bottles = bottles - 1 # Decrease the number of bottles by one.
28.         print(bottles, 'bottles of milk on the wall!')
29.         time.sleep(PAUSE)
30.         print() # Print a newline.
31.
32.     # Display the last stanza:
33.     print('1 bottle of milk on the wall,')
34.     time.sleep(PAUSE)
35.     print('1 bottle of milk,')
36.     time.sleep(PAUSE)
37.     print('Take it down, pass it around,')
38.     time.sleep(PAUSE)
39.     print('No more bottles of milk on the wall!')
40. except KeyboardInterrupt:
41.     sys.exit() # When Ctrl-C is pressed, end the program.

```

After entering the source code and running it a few times, try making experimental changes to it. On your own, you can also try to figure out how to do the following:

- Create a program for the repetitive song “The Twelve Days of Christmas.”
- Create programs for other cumulative songs. You can find a list of them at https://en.wikipedia.org/wiki/Cumulative_song.

Exploring the Program

Try to find the answers to the following questions. Experiment with some modifications to the code and rerun the program to see what effect the changes have.

1. What happens if you change `bottles = bottles - 1` on line 27 to `bottles = bottles - 2`?
2. What happens if you change `while bottles > 1:` on line 20 to `while bottles < 1:`?
