

```
29.  
30.     if text.upper() == 'QUIT':  
31.         print('Thanks for playing!')  
32.         sys.exit()  
33.  
34.     tts.say(text) # Add some text for the TTS engine to say.  
35.     tts.runAndWait() # Make the TTS engine say it.
```

Exploring the Program

This is a base program, so there aren't many options to customize it. Instead, consider what other programs of yours would benefit from text-to-speech.
