

```
129. # If the program is run (instead of imported), run the game:
130. if __name__ == '__main__':
131.     main()
```

After entering the source code and running it a few times, try making experimental changes to it. On your own, you can also try to figure out how to do the following:

- Add additional types of clickbait headlines.
- Add new categories of words, beyond NOUNS, STATES, and so on.

Exploring the Program

Try to find the answers to the following questions. Experiment with some modifications to the code and rerun the program to see what effect the changes have.

1. What error message do you get if you delete or comment out `numberOfHeadlines = int(response)` on line 34?
2. What error message do you get if you change `int(response)` to `response` on line 34?
3. What error message do you get if you change line 19 to `WHEN = []`?
