

You'll see that the migration is successfully completed.

Command Line - RESPONSE

```
Operations to perform:  
Apply all migrations: admin, auth, contenttypes,  
employee_learning, sessions, test_app  
Running migrations:  
Applying employee_learning.0003_division  
_in_scope... OK
```

4. Check the Django admin site

Go to localhost:8000/admin/. Open one of the records of the *Division* model. You can see that the *in_scope* field with the helping text message has been added to the Division model. Also, the checkbox is not checked, as we put "False" as the default value for existing records.

The screenshot shows the 'Change division' form in the Django admin interface. The form is for the 'Product Development' division. It includes a 'Div name' field with the value 'Product Development'. Below this is a checkbox labeled 'In scope' which is currently unchecked. A tooltip or help text is visible next to the checkbox, stating 'If the division is target for the learning program, check this field.' At the bottom of the form, there are four buttons: 'Delete' (in red), 'Save and add another', 'Save and continue editing', and 'SAVE'.
