

Generic View Basic Attributes

Attributes	✓ Relevant attributes				
	ListView	DetailView	CreateView	UpdateView	DeleteView
model or queryset	✓	✓	✓	✓	✓
template_name	✓	✓	✓	✓	✓
context_object_name	✓	✓			
fields			✓	✓	
success_url			✓	✓	✓

Attributes in **generic views** are key design elements when you create a new view using generic views. For example, you can define which template file will be used for the view or which model will be used for the view. Required or optional attributes are different in each generic view.

views.py

```
class MyView(ListView):  
    template_name = xxx  
    model = xxx
```
