

```
        success_url=reverse_lazy ('course_list')

class CourseDelete(DeleteView):
    model=LearningCourse
    template_name =
    'employee_learning/course_delete.html'
    success_url=reverse_lazy ('course_list')
```

To see the output of these views, you need to create urls.py and Django templates, which will be explained in the following sections.
