

4. With both all() method and the for statement

Change the code to the one below and check the detail page.

templates/employee_learning/course_detail.html

```
:  
<p>Assigned Employees : <p>  
{% for emp in object.employee.all %}  
<p>{{ emp.name }} : {{ emp.division }}<p>  
{% endfor %}
```

Now, you can see that the data are properly displayed.

```
Assigned Employees :  
  
Leslie Alexander : Product Development  
  
Floyd Miles : Product Development
```
