CREATE Page

Title:

Level:

Employee:

2. Edit `course_update.html` and check the result in a browser

Open the `course_update.html` file, add the yellow lines below (the same code as the one for the create page), and save the file.

`templates/employee_learning/course_update.html`

```
<h1>UPDATE Page</h1>
<form method="post"> {% csrf_token %}
  {{ form.as_p }}
  <input type="submit" value="Save">
</form>
```

After saving the file, Go to `localhost:8000/employee-learning/course-update/3/`. To go to an update page, you need to specify the `id` number.
