

2. Get code for CDN

Find a CDN version that is easier to implement. Click on the copy button to get the code.

3. Paste the code into the base.html file and make some adjustments

Paste the code into the base.html file and adjust the code like shown below. The yellow lines are from Bootstrap. Keep the body contents from the original *base.html* file and update the website title to *Employee Learning*.

templates/base.html
