

Select one of the card styles and copy the code. In this practice, choose the basic one but delete the image like shown below.

2. Paste the code into the course_list.html file and make some adjustments

Paste the code into the list.html file (after the {% for %} tag). Adjust the code like shown below.

templates/course_list.html

```
{% for course in object_list %}

<div class="card" style="width: 18rem;">
```
