

You can see that the background color has changed to light blue.

As this is for testing purposes, change the color back to white and save the CSS file.

Practice 2

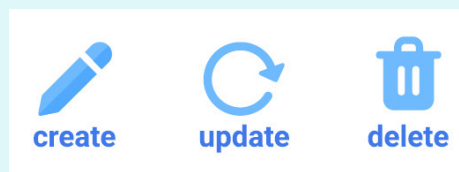

Objective:

Learn how to add images to Django templates

In this practice, we'll demonstrate how to add icons on the create, update, and delete page.

1. Prepare image files

In this practice, we'll use the three icons below. You can find similar ones on the free icon sites. Save the icons under the *images* directory under the static directory.

2. Edit HTML files
