

The default setting is `"False"`. Thus, when this setting is commented out, you still go to the Logout page when clicking on the logout link. To change the setting, take out `#` like shown below.

config/settings.py

```
# LOGIN and LOGUT Redirection
LOGIN_REDIRECT_URL = '/employee-learning/course-list/'
ACCOUNT_LOGOUT_REDIRECT_URL = '/accounts/login/'
ACCOUNT_LOGOUT_ON_GET = True
```

Refresh the browser and click on the logout link. You'll be immediately logged out.
