

2. Edit settings.py

To change the console-based email verification setting to email-based verification, edit *settings.py*.

- Change `EMAIL_BACKEND` to `'django.core.mail.backends.smtp.EmailBackend'`
- Add email settings

The `EMAIL_BACKEND` setting enables Django to send emails using the **SMTP protocol**.

config/settings.py

```
EMAIL_BACKEND = 'django.core.mail.backends.smtp.EmailBackend'

EMAIL_HOST = 'smtp.gmail.com'
EMAIL_HOST_USER = 'your_account@gmail.com'
EMAIL_HOST_PASSWORD = 'App Password'
EMAIL_USE_SSL = True
EMAIL_USE_TLS = False
EMAIL_PORT = 465
DEFAULT_FROM_EMAIL = 'your_account@gmail.com'
```
