

Django Allauth (5) – Social Login with GitHub

Django Allauth (5) – Social Login with GitHub

This lesson will explain how to set up a **social login** with **GitHub**. The approach can change depending on GitHub's policy. This approach is valid as of April 2023.

1. Register a new OAuth app on the GitHub website

Go to your [GitHub](#) account page to set up a new **OAuth** app. Open the menu from the user icon on the top right. Select **Settings**.
