

Register a new OAuth application

Application name *
Employee Learning
Something users will recognize and trust.

Homepage URL *
http://localhost:8000
The full URL to your application homepage.

Application description
Application description is optional
This is displayed to all users of your application.

Authorization callback URL *
http://localhost:8000/accounts/github/login/callback/
Your application's callback URL. Read our [OAuth documentation](#) for more information.

☐ **Enable Device Flow**
Allow this OAuth App to authorize users via the Device Flow.
Read the [Device Flow documentation](#) for more information.

Register application [Cancel](#)

Once you type them correctly, press the **Register application** button.

You can see the registered app details with **Client ID**. Click on the **Generate a new client secret** button to generate a Client secret. Copy the **Client ID** and **Client secret**, and save them in a safe place. We'll use them later.
