

2. Edit settings.py

To add the GitHub social login feature, you need to edit *settings.py*.

- Add **allauth github app** in the `INSTALLED_APPS` section
- Add `SCOPE` under `SOCIALACCOUNT_PROVIDERS`

config/settings.py

```
INSTALLED_APPS = [  
    :  
        'allauth.socialaccount.providers.github',  
]  
  
###Social Login###  
SOCIALACCOUNT_PROVIDERS = {  
    'github': {  
        'SCOPE': [  
            'user',
```
