Permissions

[Revoke access](#)

- ✓ Read org and team membership, read org projects
- ✓ Full control of private repositories
- ✓ Update all user data

Applications act on your behalf to access your data based on the permissions you grant them. Organizations control which applications are allowed to access their private data. Applications you authorize will always have access to public data in your organizations. [Read about third-party access.](#)

When the user wants to use the GitHub social login for your web application again, they will need to reauthorize the access through your web application.
