Create OAuth client ID

Application type *
Web application

Name *
Employee Learning

The name of your OAuth 2.0 client. This name is only used to identify the client in the console and will not be shown to end users.

The domains of the URIs you add below will be automatically added to your [OAuth consent screen](#) as [authorised domains](#).

Authorised JavaScript origins

For use with requests from a browser

URIs 1 *
http://localhost:8000

+ ADD URI

Authorised redirect URIs

For use with requests from a web server

URIs 1 *
http://localhost:8000/accounts/google/login/callback/

+ ADD URI

Note: It may take five minutes to a few hours for settings to take effect

CREATE CANCEL

Once you have filled in all the required data, click on **CREATE**. You can see a pop-up with the **Client ID** and **Client secret** and save them somewhere in a safe place. We'll use them later.
