

## OAuth client created

The client ID and secret can always be accessed from Credentials in APIs & Services

OAuth access is restricted to the [test users](#) listed on your [OAuth consent screen](#)

|                                                                                                 |                                                                                           |                                                                                     |

OK

## 2. Edit settings.py

To add the Google social login feature, you need to edit settings.py.

- Add `allauth google app` in the `INSTALLED_APPS` section
- Add `SCOPE` and other settings under `SOCIALACCOUNT_PROVIDERS`

config/settings.py

```
INSTALLED_APPS = [  
    :  
    'allauth.socialaccount.providers.github',  
    'allauth.socialaccount.providers.google',  
]  
  
###Social Login###  
SOCIALACCOUNT_PROVIDERS = {  
    'github': {  
        'SCOPE': [  

```
