3. Add quick styling

Apply the following four styling approaches in all the relevant template files.

Overall layout

In the `account/base.html` file, add a new container tag `<div class="container w-50" style="min-width:300px; max-width: 500px;">` to wrap all elements

`templates/account/base.html`

```
:
{% endif %}
<div class="container w-50" style="min-width:300px; max-width:
500px;">
    {% block content %}
    {% endblock %}
    {% endblock %}
    {% block extra_body %}
    {% endblock %}
</div>
{% include "base/footer.html" %}
:
```

Doing this will move the main content to the center.
