

The screenshot shows a web page titled 'Sign In' under the 'Training Registration' header. The header includes links for 'List', 'Create', 'Sign In', and 'Sign Up'. The main content area has a heading 'Sign In' followed by instructions: 'Please sign in with one of your existing third party accounts. Or, [sign up](#) for a localhost:8000 account and sign in below:'. Below this are two bullet points: '• [GitHub](#)' and '• [Google](#)'. A separator 'or' is followed by an 'E-mail:' label and an input field, and a 'Password:' label and an input field. There is a 'Remember Me:' checkbox and a 'Forgot Password?' link. A 'Sign In' button is at the bottom right of the form area. The footer text is '2023 Employee Learning'.

Title <h1> tag

In the custom.css file, add the following style for <h1> tag

- text-align: center;
- margin:3rem;

This gives you the same results as with `class="m-5 text-center"`, which we used for the list page, etc.

static/css/custom.css

```
body {  
  background-color: white;  
}  
h1{  
  text-align: center;  
  margin:3rem;  
}
```

Doing this will make the positioning of the title more appealing.
