

To fix the page, edit *socialaccount/snippets/provider_list.html* by doing the following:

- Add `d-flex` to arrange the icons horizontally
- Delete the markers using the `list-style-type` property
- Delete `{{provider.name}}`

templates/socialaccount/snippets/provider_list.html

```
{% load socialaccount %}
{% get_providers as socialaccount_providers %}
<div class="d-flex justify-content-center gap-3">
  {% for provider in socialaccount_providers %}
    {% if provider.id == "openid" %}
      {% for brand in provider.get_brands %}
        <li>
          <a title="{{brand.name}}"
            class="socialaccount_provider {{provider.id}} {{brand.id}}"
            href="{% provider_login_url provider.id openid=brand.openid_url
              process=process %}"
            >{{brand.name}}</a>
        </li>
      {% endfor %}
    {% endif %}
    <li style="list-style-type: none;">
      <a title="{{provider.name}}" class="socialaccount_provider
        {{provider.id}}"
        href="{% provider_login_url provider.id process=process
          scope=scope auth_params=auth_params %}">###delete###</a>
    </li>
  {% endfor %}
</div>
```

Now you can see a better design.
