

1. Display a username
2. Adjust the position with Bootstrap
3. Add a user icon
4. Add logic to display only when a user logs in

1. Display a username

To display a username, use two tags – `{% load account %}` and `{% user_display user %}`. Place `{% user_display user %}` where you want to display a username. And, add `{% load account %}` before `{% user_display user %}`.

2. Adjust the position with Bootstrap

You need to create another `<ul>` tag with the `navbar-nav` class to display the user name on the top right of the corner. Add `ms-auto` (**margin start auto**) in the tag.
