```
      <li> <i>No members</i> </li>
    {% endfor %}
  </ul>
{% endblock content %}
```

The following listing contains the template for the Bands Listing page.

Listing E.15 Template for the Bands Listing page

```
<!-- RiffMates/templates/bands.html -->
{% extends "base.html" %}

{% block title %}
  {{block.super}}: Band Listing
{% endblock %}

{% block content %}
  <h1>Bands</h1>

  <ul>
    {% for band in bands %}
      <li> <a href="{% url 'band' band.id %}"> {{band.name}} </a> </li>
    {% empty %}
      <li> <i>No bands in the database</i> </li>
    {% endfor %}
  </ul>

  {% if page.has_other_pages %}
    {% if page.has_previous %}
      <a href="{% url 'bands' %}?page={{page.previous_page_number}}"
        > Prev</a>
         
    {% endif %}
    {% if page.has_next %}
      <a href="{% url 'bands' %}?page={{page.next_page_number}}"> Next</a>
    {% endif %}
  {% endif %}
{% endblock content %}
```

Conditional section if there are more pages

Conditional section if there is a page previous to this one

Link to the previous page using a query parameter.

Conditional section if there is a page after this one

Exercise 3

Add a page that lists all `Venue` objects along with their corresponding rooms. You will need to iterate over the `room_set` query manager in the template.

A view for listing venues is similar to those for listing bands and musicians, shown in the following listing.

Listing E.16 Listing and detail views for your bands

```
# RiffMates/bands/views.py
...
```
