

documentation at <https://docs.python.org/3/reference/datamodel.html> describes Python objects in greater detail.

Nina Zakharenko's PyCon 2016 talk, "Memory Management in Python —The Basics," at <https://youtu.be/F6u5rhUQ6dU>, explains many details about how Python's garbage collector works. The official Python documentation at <https://docs.python.org/3/library/gc.html> has more information about the garbage collector.

The Python mailing list discussion about making dictionaries ordered in Python 3.6 makes for good reading as well and is at <https://mail.python.org/pipermail/python-dev/2016-September/146327.html>.
