

The first time you play *Alien Invasion*, your score will be the high score, so it will be displayed as the current score and the high score. But when you start a second game, your high score should appear in the middle and your current score should appear at the right, as shown in Figure 14-4.

Figure 14-4: The high score is shown at the top center of the screen.

## Displaying the Level

To display the player's level in the game, we first need an attribute in `GameStats` representing the current level. To reset the level at the start of each new game, initialize it in `reset_stats()`:

---

```
game_stats.py    def reset_stats(self):
                  """Initialize statistics that can change during the game."""
                  self.ships_left = self.settings.ship_limit
                  self.score = 0
                  self.level = 1
```

---

To have `Scoreboard` display the current level, we call a new method, `prep_level()`, from `__init__()`:

---

```
scoreboard.py    def __init__(self, ai_game):
                  --snip--
                  self.prep_high_score()
                  self.prep_level()
```

---

Here's `prep_level()`:

---

```
scoreboard.py    def prep_level(self):
                  """Turn the level into a rendered image."""
                  level_str = str(self.stats.level)
```

---
