

GitHub’s API returns a lot of information about each repository: there are 78 keys in `repo_dict` ❸. When you look through these keys, you’ll get a sense of the kind of information you can extract about a project. (The only way to know what information is available through an API is to read the documentation or to examine the information through code, as we’re doing here.)

Let’s pull out the values for some of the keys in `repo_dict`:

```
python _repos.py --snip--
# Examine the first repository.
repo_dict = repo_dicts[0]

print("\nSelected information about first repository:")
❶ print(f"Name: {repo_dict['name']}")
❷ print(f"Owner: {repo_dict['owner']['login']}")
❸ print(f"Stars: {repo_dict['stargazers_count']}")
  print(f"Repository: {repo_dict['html_url']}")
❹ print(f"Created: {repo_dict['created_at']}")
❺ print(f"Updated: {repo_dict['updated_at']}")
  print(f>Description: {repo_dict['description']}")
```

Here, we print the values for a number of keys from the first repository’s dictionary. We start with the name of the project ❶. An entire dictionary represents the project’s owner, so we use the key `owner` to access the dictionary representing the owner, and then use the key `login` to get the owner’s login name ❷. Next, we print how many stars the project has earned ❸ and the URL for the project’s GitHub repository. We then show when it was created ❹ and when it was last updated ❺. Finally, we print the repository’s description.

The output should look something like this:

```
Status code: 200
Total repositories: 248
Complete results: True
Repositories returned: 30

Selected information about first repository:
Name: public-apis
Owner: public-apis
Stars: 191493
Repository: https://github.com/public-apis/public-apis
Created: 2016-03-20T23:49:42Z
Updated: 2022-05-12T06:37:11Z
Description: A collective list of free APIs
```

We can see that the most-starred Python project on GitHub as of this writing is *public-apis*. Its owner is an organization with the same name, and it has been starred by almost 200,000 GitHub users. We can see the URL for the project’s repository, its creation date of March 2016, and that it was updated recently. Additionally, the description tells us that *public-apis* contains a list of free APIs that programmers might be interested in.
