

The form's action argument includes the `topic.id` value in the URL, so the view function can associate the new entry with the correct topic ❷. Other than that, this template looks just like *new_topic.html*.

Linking to the new_entry Page

Next, we need to include a link to the `new_entry` page from each topic page, in the topic template:

```
topic.html {% extends "learning_logs/base.html" %}

{% block content %}

    <p>Topic: {{ topic }}</p>

    <p>Entries:</p>
    <p>
        <a href="{% url 'learning_logs:new_entry' topic.id %}">Add new entry</a>
    </p>

    <ul>
        --snip--
    </ul>

{% endblock content %}
```

We place the link to add entries just before showing the entries, because adding a new entry will be the most common action on this page. Figure 19-2 shows the `new_entry` page. Now users can add new topics and as many entries as they want for each topic. Try out the `new_entry` page by adding a few entries to some of the topics you've created.
