

Figure 19-4: The login page

Logging Out

Now we need to provide a way for users to log out. Logout requests should be submitted as POST requests, so we'll add a small logout form to *base.html*. When users click the logout button, they'll go to a page confirming that they've been logged out.

Adding a Logout Form to *base.html*

We'll add the form for logging out to *base.html* so it's available on every page. We'll include it in another if block, so only users who are already logged in can see it:

```
base.html  --snip--
{% block content %}{% endblock content %}

{% if user.is_authenticated %}
❶  <hr />
❷  <form action="{% url 'accounts:logout' %}" method='post'>
    {% csrf_token %}
    <button name='submit'>Log out</button>
  </form>
{% endif %}
```

The default URL pattern for logging out is 'accounts/logout/'. However, the request has to be sent as a POST request; otherwise, attackers can easily force logout requests. To make the logout request use POST, we define a simple form.

We place the form at the bottom of the page, below a horizontal rule element (<hr />) ❶. This is an easy way to always keep the logout button in a
