

be confusing at first, because many pages have deeply nested `div` elements. Here, we're using the `span` element to style informational text on the navigation bar: in this case, the logged-in user's name.

In the `else` block, which runs for unauthenticated users, we include the links for registering a new account and logging in ❹. These should look just like the link to the topics page.

If you wanted to add more links to the navigation bar, you'd add another `<li>` item to one of the `<ul>` groups that we've defined, using styling directives like the ones you've seen here.

Now let's add the logout form to the navigation bar.

Adding the Logout Form to the Navigation Bar

When we first wrote the logout form, we added it to the bottom of *base.html*. Now let's put it in a better place, in the navigation bar:

```
base.html      --snip--
               </ul> <!-- End of account-related links -->

               {% if user.is_authenticated %}
               <form action="{% url 'accounts:logout' %}" method='post'>
                 {% csrf_token %}
❶               <button name='submit' class='btn btn-outline-secondary btn-sm'>
                   Log out</button>
               </form>
               {% endif %}

               </div> <!-- Closes collapsible parts of navbar -->
               --snip--
```

The logout form should be placed after the set of account-related links, but inside the collapsible section of the navigation bar. The only change in the form is the addition of a number of Bootstrap styling classes in the `<button>` element, which apply Bootstrap styling elements to the logout button ❶.

Reload the home page, and you should be able to log in and out using any of the accounts you've created.

There's still a bit more we need to add to *base.html*. We need to define two blocks that the individual pages can use to place the content specific to those pages.

Defining the Main Part of the Page

The rest of *base.html* contains the main part of the page:

```
base.html      --snip--
               </nav> <!-- End of navbar -->

❶ <main class="container">
❷   <div class="pb-2 mb-2 border-bottom">
     {% block page_header %}{% endblock page_header %}
   </div>
```
