

language than to provide explanations. The examples in the official documentation should work, but you might not understand everything shown. Still, it's a good resource to check when it comes up in your searches, and it will become more useful to you as you continue building your understanding of Python.

Official Library Documentation

If you're using a specific library, such as Pygame, Matplotlib, or Django, links to the official documentation for it will often appear in searches. For example, <https://docs.djangoproject.com> is very helpful when working with Django. If you're planning to work with any of these libraries, it's a good idea to become familiar with their official documentation.

r/learnpython

Reddit is made up of a number of subforums called *subreddits*. The *r/learnpython* subreddit (<https://reddit.com/r/learnpython>) is very active and supportive. You can read others' questions and post your own as well. You will often get multiple perspectives about the questions you raise, which can be really helpful in gaining a deeper understanding of the topic you're working on.

Blog Posts

Many programmers maintain blogs and share posts about the parts of the language they're working with. You should look for a date on the blog posts you find, to see how applicable the information is likely to be for the version of Python you're using.

Discord

Discord is an online chat environment with a Python community where you can ask for help and follow Python-related discussions.

To check it out, head to <https://pythondiscord.com> and click the **Discord** link at the upper right. If you already have a Discord account, you can log in with your existing account. If you don't have an account, enter a username and follow the prompts to complete your Discord registration.

If this is your first time visiting the Python Discord, you'll need to accept the rules for the community before participating fully. Once you've done that, you can join any of the channels that interest you. If you're looking for help, be sure to post in one of the Python Help channels.
